

KPI's & Exception-based Reporting

Earned Recognition KPI's

Earned Recognition KPIs are generated monthly one month in arrears as required by the ER Scheme, but Freeway keeps LIVE KPIs for the current month so that there is never any surprise regarding the DVSA submission. This KPI is available on managers' mobile phones as well as on desktop. The KPI's don't just report on the status - but also show the items that are not yet resolved as well as what needs to be done to resolve them. For example against an MOT that is not yet marked as 'Done', Freeway will specify that a status must be updated and provides a one-click access to the screen against which this can be updated

Combination reports & access buttons

The Freeway Web-App interface provides high-level summaries available per workshop relating to Driver Defects, Engineer Defects, Safety Inspections, Vehicle Status etc. Each summary tile also serves in the form of a button that gives access to the detail

Vehicle Fitness

A quick view to see how many vehicles are fit for operation and how many are grounded for repairs / maintenance

Driver Defects

At a glance, see how many driver defects are outstanding, critical, new today and how many have been rectified today

Engineering Defects

Instantly see how many engineering defects are outstanding, critical, new today and how many have been rectified today

Outstanding Labour List

A complete overview of ALL work to be done at a particular workshop

Services

View all scheduled events and their progress

Safety Inspections

See how many are due this week, and how many have been completed, cancelled, postponed and are overdue

Annual Check

Instantly see how many are due this week, and how many have been completed, cancelled, postponed and are overdue

Staff

View staff that are available for work, who's not at work, slow performers and currently on breaks
